DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 - 7, drawn to a method for restricting travel of a moving contact, classified in class 29, subclass 592.1.
- II. Claims 8 - 20 and 21 - 31, drawn to lighting contactor and lighting contactor block assembly classified in class 200, subclass 16A.

Group I is separate and distinct from Group II because Group II does not require any "positioning" steps which is to say the positioning could have already been accomplished whenever the contact or contact carrier was made up.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
